Description	
<p>Last updated: 2009-03-20 Status: CLOSITEM - Closed item Initiated: 2008-06-10 By: Västra Götalands regionen (Mona-Lis Dalbrekt)/CPK, Sweden Expert Network 2009-02-26 - Change recommended Board 2009-03-20 - Recommendation accepted</p>	
BACKGROUND	
<p>CPK ID 270</p>	
Problem	
<p>The procedure ABD40 'Implantation of spinal injection device' is used for cancer patients suffering from pain. The cancer can be located almost anywhere but if ABD40 is used together with a primary diagnosis from MDC 04 or MDC 06 (which actually occurs) the case will be grouped to DRG 468 because ADB40 has OR 1 property but no specific procedure properties for MDC 04 and MDC 06.</p>	
Suggestion	
<p>ABD40 with procedure properties for MDC 04 and MDC06 in addition to the existing properties. There is no need for new DRGs so we could use existing procedure properties, for example:</p>	
<p>04S02 (leads to DRG 076/077) and 06S10 (leads to DRG 170/171).</p>	
Analysis	
<p>An analysis is not necessary since the problem is of minor economical importance (few cases).</p>	
COMMENTS:	
Expert Network 2009-02-26	
<p>The meeting recommended to accept the proposal that for ABD40 add:</p>	
<p>04S02 (leads to DRG 076/077) and 06S10 (leads to DRG 170/171).</p>	
CHANGES:	

Technical changes:
