

Nordic Casemix Centre - Case #252

Task # 11 (Closed): Delivery of minor update proposals for NordDRG 2015

Disorders of pigmentation can be complicated by heart diseases and congenital malformations

2014-02-18 12:26 - Anonymous

Status: Accepted	Start date: 2014-02-13

Description

National ID: CPK ID 536

Initiated: 2013-11-13

Initiator: NPK, Sweden

Problem

The Swedish National Board of Health and Welfare (SOS) makes own definition tables parallel to the process at the Nordic Casemix Centre (NCC) and the current problem was discovered during routine comparison between SWE2014CC-SOS-PR02 (SOS version) and SWE2014PR0F (NCC version) in the autumn 2013.

During the updating process for NordDRG 2014 we noticed that L81 (Other disorders of pigmentation) and all the Swedish subcodes were on the exclusion list under the following compl values:

- 05C19 Major cardiac anomaly involving left ventricle
- 05C21 Congenital defect of pulmonary valve
- 05C22 Anomaly involvin right ventricle or cardiac valve (not aortic valve)
- 05C24 Congenital heart block
- 05C25 Coarctation or atresia of aorta or interrupted aortic arch
- 23C04 Compound anomalies

Suggestion

NPK, Sweden – 2014-01-29

This is obviously wrong. Cases with a principal diagnosis in chapter L81 can of course be complicated by heart diseases and congenital malformations. All codes beginning with L81 must be removed from the exclusion list. See [Suggestion CPK ID 536.xls](#).

History

#1 - 2014-03-13 14:05 - Anonymous

- Parent task set to #11

#2 - 2014-03-17 17:39 - Martti Virtanen

- Description updated

2014-03-17 Martti Virtanen

These exclusions have already been removed. They have been created (by error) probably because of problems of the mapping that were solved with ICD-10+

#3 - 2014-03-24 16:31 - Anonymous

Comment Expert Group 2014-03-24

Correction already done to 2014.

Proposal accepted.

#4 - 2014-04-15 13:32 - Anonymous

- *Target Grouper SWE added*

#5 - 2015-02-06 10:50 - Anonymous

- *Status changed from Active to Accepted*
