

Nordic Casemix Centre - Case #284

Task # 11 (Closed): Delivery of minor update proposals for NordDRG 2015

Case # 277 (Accepted): Differences of procedure properties between national versions of NordDRG

Injection of therapeutic agent into or percutaneous occlusion of vein

2014-03-04 09:18 - Anonymous

Status:	Accepted	Start date:	2014-02-26
Priority:	Minor	Spent time:	0.00 hour
Assignee:	Martti Virtanen		
Category:			
Target version:	Expert Group 2014		
Initiator:	Nordic Casemix Centre	Target year:	2015
Case type:		Owner / responsible:	Nordic Casemix Centre
MDC:	MDC05	Old forum status:	
Target Grouper:	COMMON, DEN, EST, FIN, ICE, LAT, NOR, SWE		

Description

- PHST10 Injection of therapeutic agent into or percutaneous occlusion of long saphenous vein
- PHST15 Injection of therapeutic agent into or percutaneous occlusion of communicating veins of lower leg or thigh
- PHST99 Injection of therapeutic agent into or percutaneous occlusion of other vein

These codes have somewhat variably the properties 21S09 'Other OR procedure for injuries' and 14S90 'Significant operation for obstetrical patient'.

14S90 is not critical – this property is only used to indicate that the intervention at issue may be part of delivery care without indicating that the patients DRG assignment would be changed. However, the property must be the same in all linked interventions. 21S09 is more problematic but even in this case the property rarely affects the grouping.

In the SWE version the properties have been removed from some of the linked codes

- PHST10:
PHV10 has no 21S09 but PHT10 has both 21S09 and 14S90
- PHST15:
PHT13 has both 21S09 and 14S90
PHV13 has neither
PHV14 has neither
- PHST99:
PHT99 has 14S90 but no 21S09
TPH10 has neither

In the other national versions there are similar situations.

Technical change

Either all codes must have both 21S09 and 14S90 or none of the codes should have them. The latter seems more appealing, but the properties will be removed from all linked codes.

DRG change

In any case minimal
