#### Description

#### Problem

This case is a result of the NDMS checkup by listing all rules that do not have any test cases in our test database. In this case there is an obvious error.

	DRG	ordnr	Impossible rule/Error	Liselotte	Martti
_miss	776V	200D1700	E	200D16914	Error in ord 200D16920 (DRG 186O/C55O). It catches all potential cases to DRG 776V/C990 and the content does not correspond to the description

Error in ord 200D16920 (DRG 186O/C55O 'Läkarbesök vid tand- & munhålesjukdomar utom tandextrakt & restaurering'). It catches all potential cases to DRG 776V/C990 'Other medical contact for ear, nose and mouth problems, short therapy' and the content does not correspond to the description

The rule for DRG 186O/C55O only differs by having 'N' on the variable OR from to rule for DRG DRG 776V/C990. Both are non-surgical groups because surgical groups are assigned earlier in the table. Therefore the content is identical and DRG 776V/C990 becomes impossible.

DRG logic rules

200D17011	774V	Icke-operativa åtgärder vid kokleaimplant						03V09									N		<1	0	Grouping completed technically	13/05	T

#### Analysis

Economic analysis is not possible because there are currently no cases in DRG 776V/C990.

The content of DRG 186O/C55O does not correspond to the title and there is obviously an error in the rule.

#### Suggestion

A correction to the rule of DRG DRG 186O/C55O. The 'tooth and mouth diseases' need to be defined

#### Technical change

Not available

#### DRG change

The content of DRG 186O/C55O will get corrected

## History

---

### #1 - 2015-03-12 10:25 - Martti Virtanen

- Description updated

### #2 - 2015-03-17 11:15 - Martti Virtanen

- Priority changed from Minor to Error correction

2015-03-13 Expert group/Martti Virtanen

Sweden will check the case before 08/2015

### #3 - 2015-06-17 14:38 - Anonymous

Mats Frenström, NPK, Sweden 2015-06-16:

Martti is right. The rules for DRG 186O/C55O and DRG 776V/C99O are almost identical and both groups are MDC 03 rest groups for outpatient visits. The text to DRG 186O/C55O was fetched from the inpatient logic and is misleading.

We want to solve the problem by deletion of DRG 186O/C55O. We want this to be done in the production version for 2016.

Detailed technical changes are described in Decisions to Forum C600 (#422).xlsx.

### #4 - 2015-06-17 14:42 - Anonymous

- File Decisions C600 (#422).xlsx added

Matts Fenströms excel-file added to forum.

### #5 - 2016-02-02 15:53 - Anonymous

- Target version changed from Target version 2016 to Expert Group 2015

### #6 - 2016-04-14 10:14 - Martti Virtanen

- Status changed from Active to Accepted

2016-03-15 Expert group (MV)

The case was closed without further discussion
